

# How can you recognize a border?

---

## Aufgaben:

1. Fill in the gaps with the right words!
2. Scan the QR code to check your answers!
3. Copy the text in your exercise book!
4. Formulate the content of the text yourself!  
Use all gap words!

There are borders that are so well \_\_\_\_\_ that you cannot miss them, for example, the US-Mexico border. This border has big \_\_\_\_\_ and at some points, it is fortified with walls. This is because many \_\_\_\_\_ from Mexico would like to get into the US. The Soviet Union was also well protected but in a \_\_\_\_\_ way. Their borders were there to keep people inside the country. It is \_\_\_\_\_ that there is a street that crosses the border, but these streets have \_\_\_\_\_ and you have to pass through a checkpoint to enter the other \_\_\_\_\_. Oftentimes, you need to show your passport. An \_\_\_\_\_ might ask you if you have anything in your belongings worth mentioning. If so, you might have to pay a \_\_\_\_\_ for these objects. It is also possible that you need a visa to cross a border. A \_\_\_\_\_ is a paper that allows a person to travel to another country, for example, for three \_\_\_\_\_, then you have to leave again. The German phrase "Grüne Grenze" (Green Border) means a \_\_\_\_\_ that is in nature. If you look on a map, you can see the border, in real \_\_\_\_\_, you can't see the border. Often there is a landscape feature that makes borders more \_\_\_\_\_, like rivers and mountains. For example, the Rhine in Germany is a massive \_\_\_\_\_ that separates Germany from France. There are also borders that are on the \_\_\_\_\_. These borders belong to nearby countries. But lots of countries argue about these \_\_\_\_\_ because they are unsure about where the borders lie.
